2006	30% CPI	Funded into plan, increased employer rate for the year
2002	2% Flat	Funded into plan, increased employer rate for the year

BEXAR COUNTY COLA RETIREMENT TYPES & COST

Retiree COLA Types:

Flat-rate COLAs

- The benefit payment increases by the selected percentage and is applied to the benefit payment the retiree is currently receiving
- Every retiree (no matter when he/she retired) gets the same percentage increase
- This Flat-rate method does not take into consideration individual retiree's loss of purchasing power. A person who retired two years ago receives the same percentage as someone who retired 30 years ago

CPI-based COLAs

- The percentage selected is not a fixed, flat rate application but rather is the percentage to restore lost purchasing power due to inflation
- The Consumer Price Index (CPI) is an index the federal government uses to measure inflation
- This CPI-based method also considers how many years the former employee has been retired and how many other COLAs were received during retirement

COLA Costs:

COLA OPTIONS	Additional Contribution to Fully Fund COLA	TCDRS Required Rate with COLA:	Estimated Payroll Cost	Change to Funded Ratio
		Jan-Dec 2025		
No COLA	N/A	14.41%	\$52,200,638	86.10%
1% Flat Rate	\$10,406,611	14.72%	\$53,323,621	85.70%
20% CPI	\$3,688,634	14.52%	\$52,599,116	86.00%
